PROFILE

iOS engineer since 2012: started in Objective-C, writing Swift since its 2014 release, building UI mainly in SwiftUI. Since 2022 I have co-designed the modular architecture of Preglife's two native apps. Since May 2026 I have been co-building their React Native / Expo successor: features, the data migration and the native layer in Swift and Kotlin.

SKILLS

iOS	Swift (since 2014) · SwiftUI · UIKit · Objective-C · Swift Concurrency · Combine · SPM & modular architecture · Coordinator / MVVM · dependency injection · Core Data · WidgetKit · push notifications & deep linking · StoreKit / RevenueCat
Cross-platform	React Native · Expo · TypeScript · TanStack Query · local-first sync (SQLite) · GraphQL / REST · native Expo modules (Swift, Kotlin) · CRM & attribution (Braze, AppsFlyer)
Process & quality	unit / snapshot / E2E testing (XCTest, Jest, Maestro) · CI/CD & release management (Fastlane, GitHub Actions, EAS) · code review · analytics & crash monitoring (Firebase, Crashlytics)
AI tooling	Claude Code · agent rules (CLAUDE.md) · MCP (Jira, Confluence, Figma)

EXPERIENCE

Senior Mobile Engineer · Preglife

May 2022 – present · Katowice, Poland

App for expectant and new parents, 11 markets · 4.9/5 on the App Store (29k ratings) · apps.apple.com/app/id390427747

Native iOS · May 2022 – present

Two native apps (international and Norwegian): UIKit, SwiftUI, Combine, Core Data; team of 2–4; in maintenance (critical fixes only) until users have fully migrated.

- Co-designed and maintained the modular architecture: ~70 Swift packages on a shared codebase, 26 of which I created, including the networking and API layer (REST, GraphQL with Apollo), the user, pregnancy and baby domain models, server-driven UI (GraphQL-described components rendered natively) and deep-link handling.
- Built the Onboarding, Offers and Sleep Sounds modules (audio engine, background timers, widget), among others, and the home-screen widgets.
- Designed and implemented the app's theming system: colours, typography and spacing defined in one place, so periodic visual refreshes need no changes to feature code.
- Responsible for third-party and partner integrations, including Braze, AppsFlyer, Kevel (native ads), RevenueCat, Contentful, insurers If (Finland) and Tryg (Denmark), and MitID (identity verification).
- Set up and ran the release process for both apps (2–6 releases a month): Fastlane and GitHub Actions pipelines to TestFlight and the App Store, Match signing, lint and tests on every PR.

Preglife · React Native / Expo · May 2026 – present

New iOS and Android app released in October 2026 as the successor to both native apps; team of five.

- Wrote native Expo modules in Kotlin and Swift: a Braze bridge (deferred SDK initialisation, in-app message actions) and a home-screen widget for iOS (WidgetKit) and Android (Glance).
- Responsible for the offers and ads module and the shared account for both parents; built the Tools, Wellness and Checklist modules, from the data layer through to analytics.
- Designed and built the data migration from the native apps into the on-device SQLite database (local-first) for signed-in and guest users, who moved over through a regular update without data loss.
- Built tooling that automates the team's work: AASA and assetlinks files generated from the app config, a shared encrypted .env (sops, age), and Maestro E2E tests (flows written with an agent against lint-enforced rules) with a screen recording and analytics-event report, run in GitHub Actions.

Flutter Developer (side contract) · Coolomat

Jan 2022 – Mar 2022 · remote

Refrigerated parcel lockers (Slovenia) · Pick-Up app in Flutter for iOS and Android · lead developer in a two-person team

- Bootstrapped the project and designed its architecture (data / domain / presentation, RxDart, GetX); built the reservation API integration (QR orders, GPS-gated locker opening), Firebase push, EN/SL translations.

Senior Software Engineer (iOS) · DAZN Group

Apr 2020 – Apr 2022 · Katowice, Poland

Global live-sports streaming platform · iOS app in Swift with RxSwift (FRP), MVVM with a service layer

- Responsible for the ads and video playback area of the DAZN iOS app within a cross-platform Scrum team (iOS, Android, web).
- Wrote unit, snapshot, integration and Gherkin acceptance tests and supported QA with test automation; maintained CI builds (Jenkins).
- Took part in hiring iOS engineers: reviewed take-home assignments and conducted technical interviews.

Senior Software Developer · EUVIC

Jan 2014 – Apr 2020 · Gliwice, Poland

Software consultancy · iOS projects for a range of clients

- Payr (Norwegian fintech): built a bill management and payment app from scratch, integrated with payment services and identity providers.
- Developed Bosch Drivelog Connect (car data over Bluetooth / OBD2), SUBWAY Loss Prevention (camera footage matched to live transactions) and UPTIVO Trainer (fitness app working with external devices).

iOS Developer · Grupa SPOT, KiooiK

Jun 2012 – Dec 2013 · Gliwice / Wrocław, Poland

- Wrote the mHOSP iPad app for the med-tech industry, the Dr. Oetker Rezeptideen recipe app and an iPad memory game in Objective-C and Cocos2d.

HOBBY PROJECTS

Underfloor heating controller · electronics

Custom controller on an ESP-01S (ESP8266) module with ESPHome firmware and Node-RED automation.

EDUCATION

B.Eng., Computer Networks and Telecommunications
Institute of Information Technology and Telecommunications in Kielce · 2004–2008
